

Automotive

Dong-Eun Forging Co. Ltd.

Client

DongEun Forging Co. Ltd., designated as a Promising Small and Medium Size Industry by the CGF, is a leading Korean producer of engine and transmission parts for automobiles.

Challenge

The opening of a second factory with their largest stamping equipment to date nearly doubled the company's expenditure on electricity.

Solution

By installing Power Optimizers™ on their 2500 ton and 1600 ton Stamping Presses, we were able to reduce the DongEun Forging Co.'s electrical expense on this equipment by 13.68%.
